

HAWK RISING

RED-TAILED HAWK GLIDER

He rides the wind
like a wave,
twisting and turning,
kiting and floating. —HAWK RISING

DIRECTIONS

If it is not attached, you can find the hawk glider template by searching “hawk” at CuriousCityDPW.com.

1. Folding to the white side of the template, fold the short side of the paper over to the right, even with the edge, and make a crease.
2. Unfold and repeat folding to the left.
3. Fold paper as shown to make a point, crease in place.
4. Fold each side tip, upward, to make a point.
5. Fold top point down now to meet the fold line. Crease well.
6. Fold plane in half and crease. Fold each wing back, leaving $\frac{1}{2}$ inch at the bottom and crease.
7. Fold both outside edges up about $\frac{1}{4}$ " and leave folded edge pointing upwards.

What changes can you make to the glider for a better flight? Use your STEM skills!

Our thanks to ZiggityZoom.com for instructions and step-by-step photos!
